# GSHP Association is established for the following purposes

---

- To encourage the growth and development of the Ground Source Heat Pump Industry in the United Kingdom by:
  - Promoting the efficient use of ground source heat pumps and raising awareness of their benefits
  - Assisting in the development of sound industry-related standards
  - Supporting the effective marketing of ground source heat pumps
- To assist, encourage and support the setting up and maintaining of high standard training for the Industry
- To provide a forum for information interchange
- To liaise with other related organisations in matters of benefit to the Industry
- To represent the Industry in matters of local, national and international interest of members

*Note: The Heat Pump Association (HPA) is the primary association dealing with manufacturing issues*

- Training and Standards
- Marketing and PR
- Technical
- External groups and lobbying
